

## REMARKS

Applicants thank the Patent Office for the careful attention accorded this Application and respectfully requests reconsideration in view of the Amendment above and remarks set forth below.

In response to the Office Action mailed August 8, 2004, Applicants have amended Claim 93 in order to include the limitations generally disclosed and claimed in US Patent No. 6,595,420, wherein the laser bar code symbol reading system automatically... [reads] a bar code symbol on an object within a first predetermined time period, and each instant said bar code symbol is read within said first predetermined time period, automatically producing a symbol character data string representative of said read bar code symbol,....and the symbol character data string produced at substantially the same time when said data transmission control activation signal is generated while said wireless laser bar code symbol reading system is operating in said operational state.

Applicants include a Terminal Disclaimer to overcome any judicially-created obviousness-type double patenting rejections in view of US Patent No. 6,595,420.

In view therefore, of the Amendment and Remarks set forth above, the present invention defined by amended Claims 93-94 is firmly believed to be neither anticipated by, nor rendered obvious in view of the prior art of record, and that the present application is now in condition for allowance.

Favorable action is earnestly solicited.

The Commissioner is hereby authorized to any fee deficiencies to Deposit Account No. 16-1340.

Respectfully submitted,

Dated: September 12, 2005

  
Thomas J. Perkowski, Esq.
